

DOCKET
04-AFC-1

DATE MAR 3 2006

RECD. MAR 7 2006

Before the Hearing Board
of the
Bay Area Air Quality Management District
State of California

In the Matter of the appeal of)	March 3, 2006
CALIFONIANS FOR RENEWABLE)	
ENERGY)	No. 3511
)	
On the city and county of San Francisco)	PETITION FOR INTERVENTION
San Francisco Electrical Reliability)	
Project. Application 12344)	

Pursuant to the rules of the hearing Board for the BAAQMD Robert Sarvey hereby requests intervention in the above captioned proceeding. I timely filed comments on the PDOC on August 31, 2005 for the Project and received responses to my comments from the district on February 6, 2006. The responses I received to comments 1,2,4 and 5 were non responsive and in direct violation of District rules and regulations. The district also failed to provide a dust management plan as required by CARB when asbestos is present at a project site. I wish to preserve my rights and present my case to the hearing board specifically challenging the FDOC and the responses received from the Districts Permit Division.

Sincerely

Robert Sarvey
